

Montana Unemployment Insurance PARTIAL BENEFIT FORMULA

If you earn more than $\frac{1}{4}$ of your weekly benefit amount in any week, your WBA will be reduced by \$.50 for each dollar earned (over $\frac{1}{4}$ of your weekly benefit amount).

Weekly Benefit Amount (WBA) = \$200

Earnings for the Week = \$380

$\frac{1}{4}$ Disregarded:

$$\$200 \times \frac{1}{4} = \$50$$

Earnings less $\frac{1}{4}$ Disregarded:

\$380 earnings less \$50 or $\frac{1}{4}$ or WBA = **\$330** to be reduced

WBA less Disregarded reduced by \$.50 for each dollar earned:

\$330 amount to be reduced \times \$.50 = **\$165** amount reduced on weekly benefit amount

WBA less Reduced Earnings:

\$200 WBA less reduced earnings = **\$35** partial benefit amount
